Candle Wicks Reading with Volume

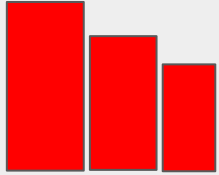

Version- 0.5

CWRV Rules

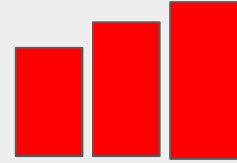

- Volume
- Rule-1
- Rule-2
- Rule-3
- Official 123
- Unofficial 123
- Marubozu rule
- Buyer Seller Area
- Muster wicks

Validation

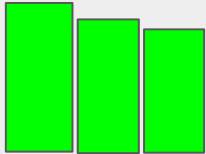

Volume of 2nd and 3rd candle is decreasing or increasing in same direction that is Validation

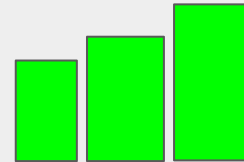

Validate = Continuation

Validate = Continuation

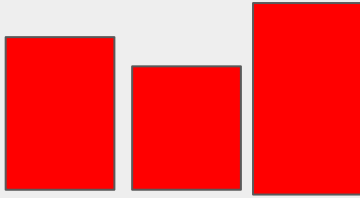

Validate = Continuation

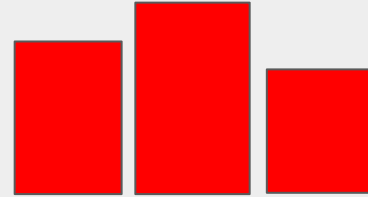

Validate = Continuation

Anomaly

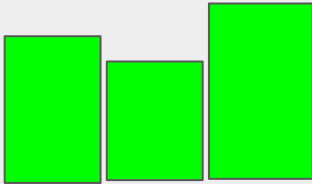

Volume of 2nd and 3rd candle is Abnormal (One is increasing and other is decreasing)

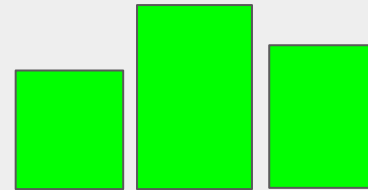

Anomaly = Reversal

Anomaly = Reversal

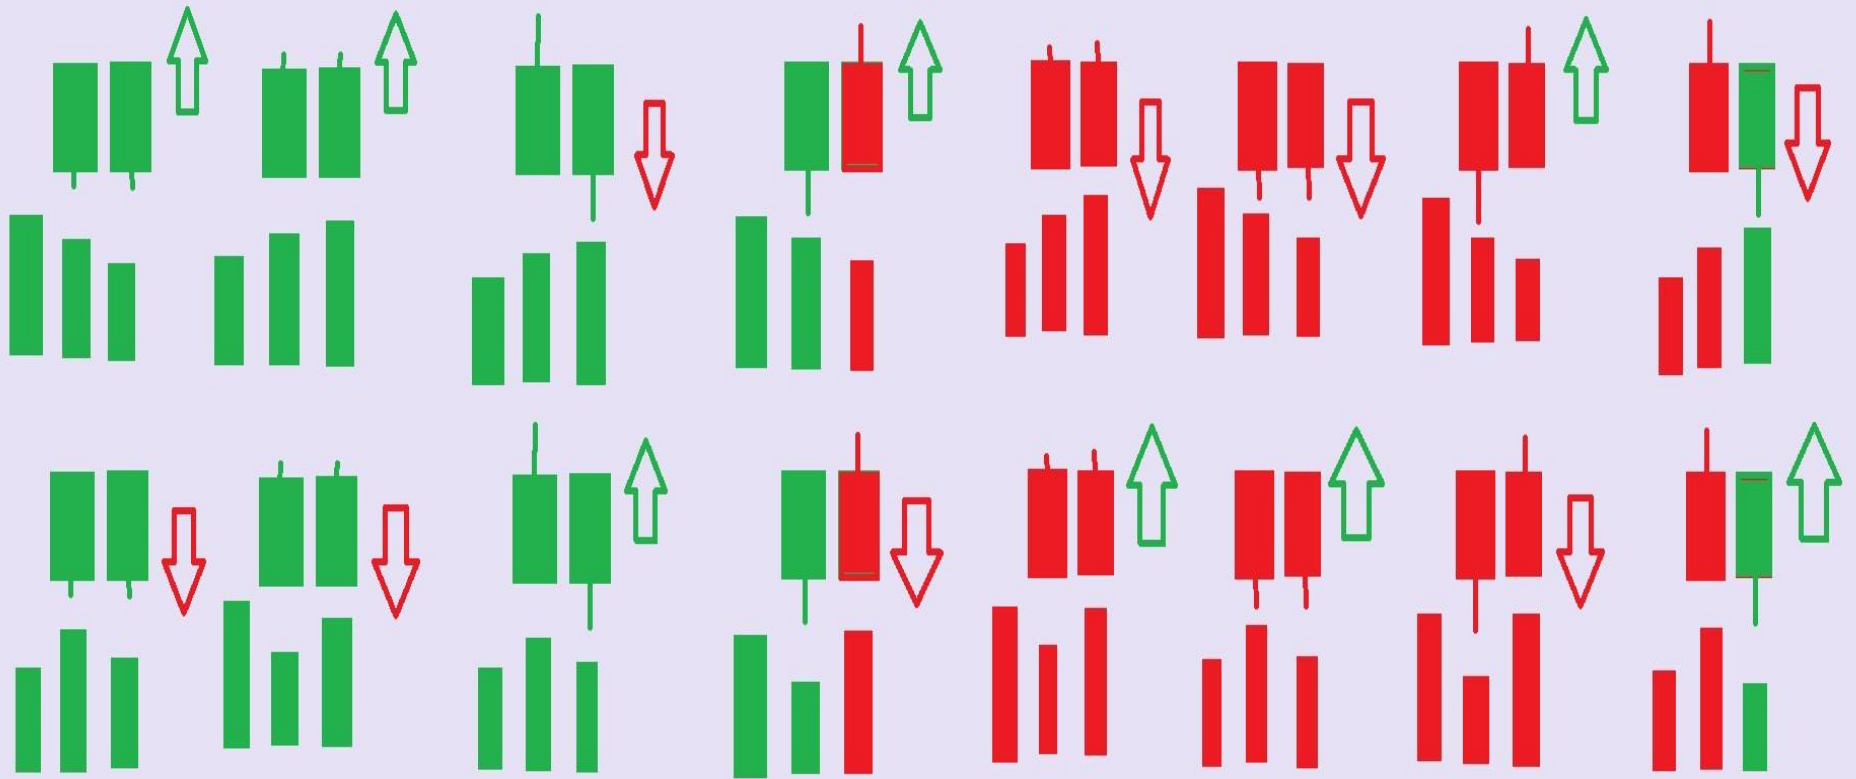

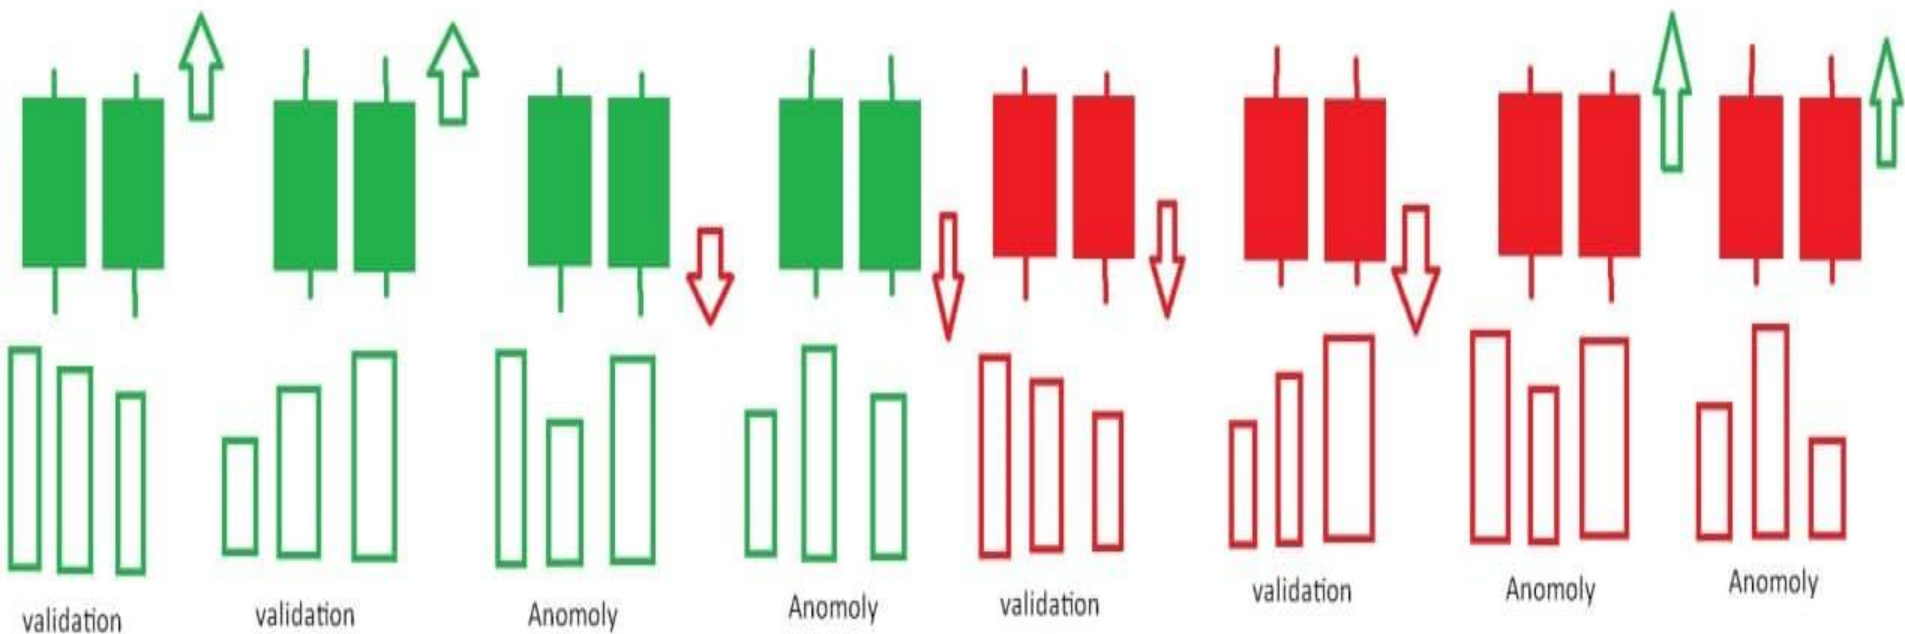

Anomaly = Reversal

Anomaly = Reversal

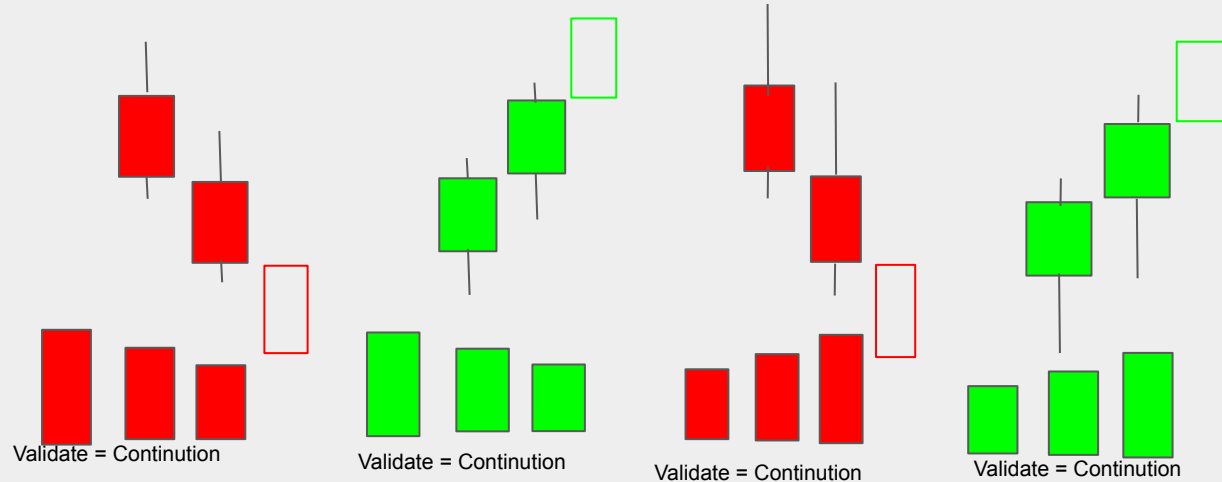

Rule : 1

Rules-1 (Similar wicks)concept-1

In this concept we focus on wicks of two candles. The wicks should be same of both candles like upper wick of 1st and 2nd candle is big and lower wick is small. (We don't compare the size of both wicks candle. We only see the wicks of the candle.)

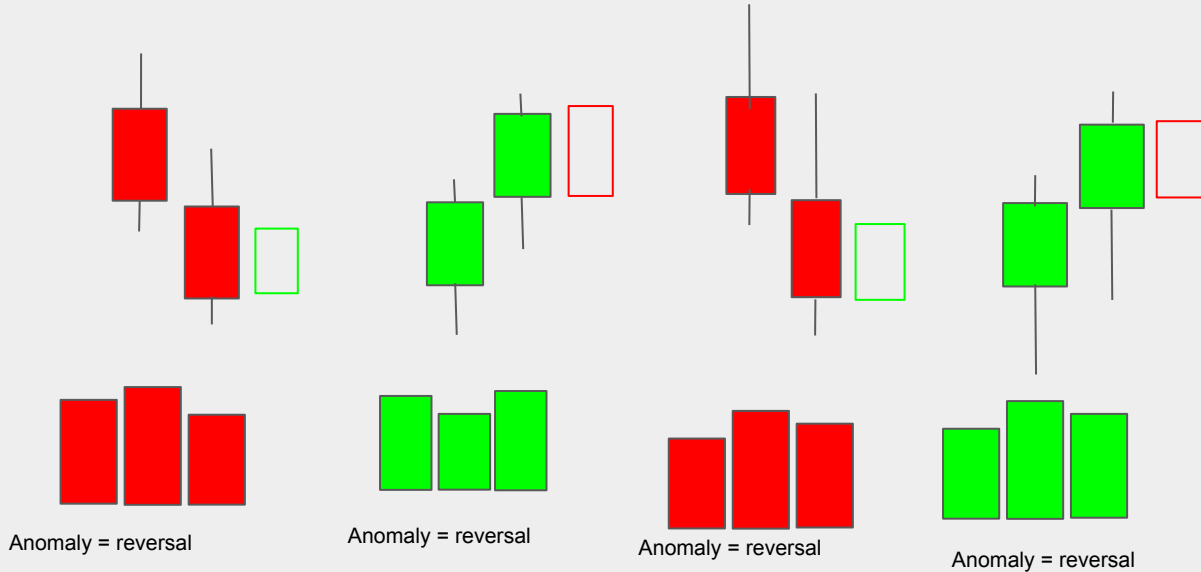

Then the 2nd conformation will be the volume. If the volume is showing validation then we do a continuation trade,

(The color of the candles Should be same.)

Rules-1 (Similar wicks)concept-1

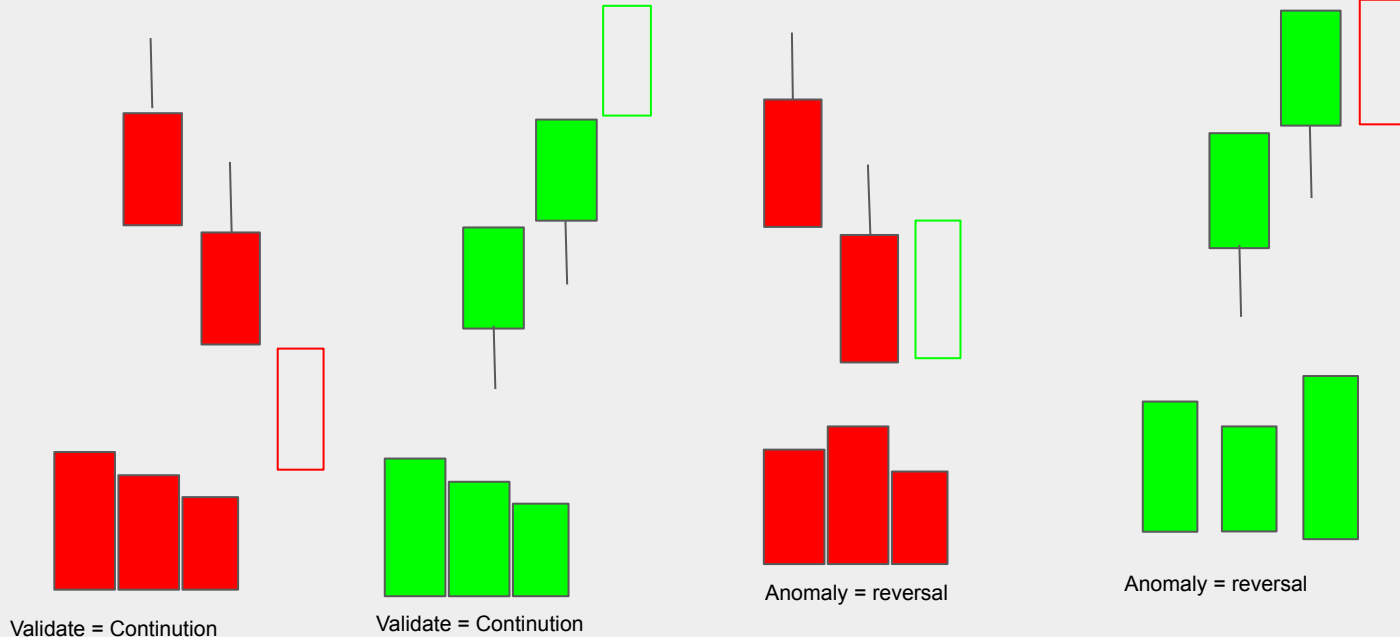

but if the volume is showing anomaly then place a reverse trade.

(The color of the candles Should be same.)

Rules-1 (One Side wicks)concept-2

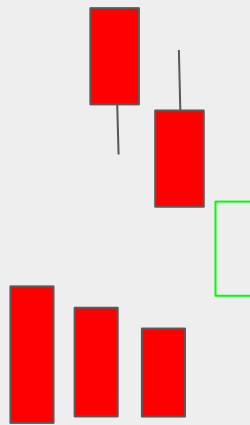

In this concept we only focus in one side wicks. The wicks of the candle should be on one side only. Just like concept 1 we also place the trades by seeing validation and anomaly.

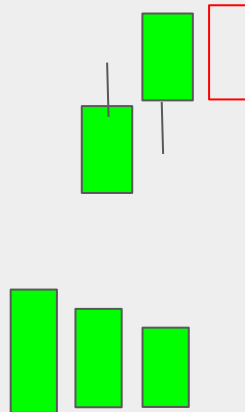

Rules-1 (Opposite wicks)concept-3

In this concept we focus on wicks of 2 candles but the bigger wicks should be on opposite sides. Like the 1st candle have a bigger wick on down side and then the 2nd candle have a bigger wick on the upper side. then it will be our opposite wicks concept .

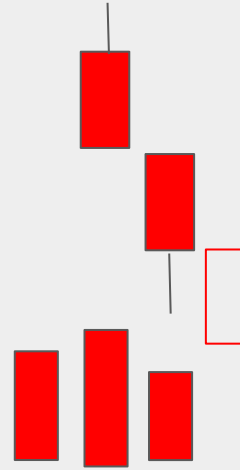

In this we don't take trades like we did in previous concept 1 and 2. Here if the volume is showing validation then we place a reverse trade and if the volume is showing anomaly then we place a continuation trade.

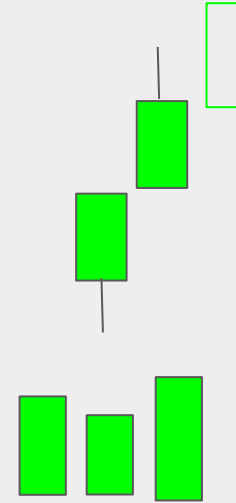

Validation = reversal

Validation = reversal

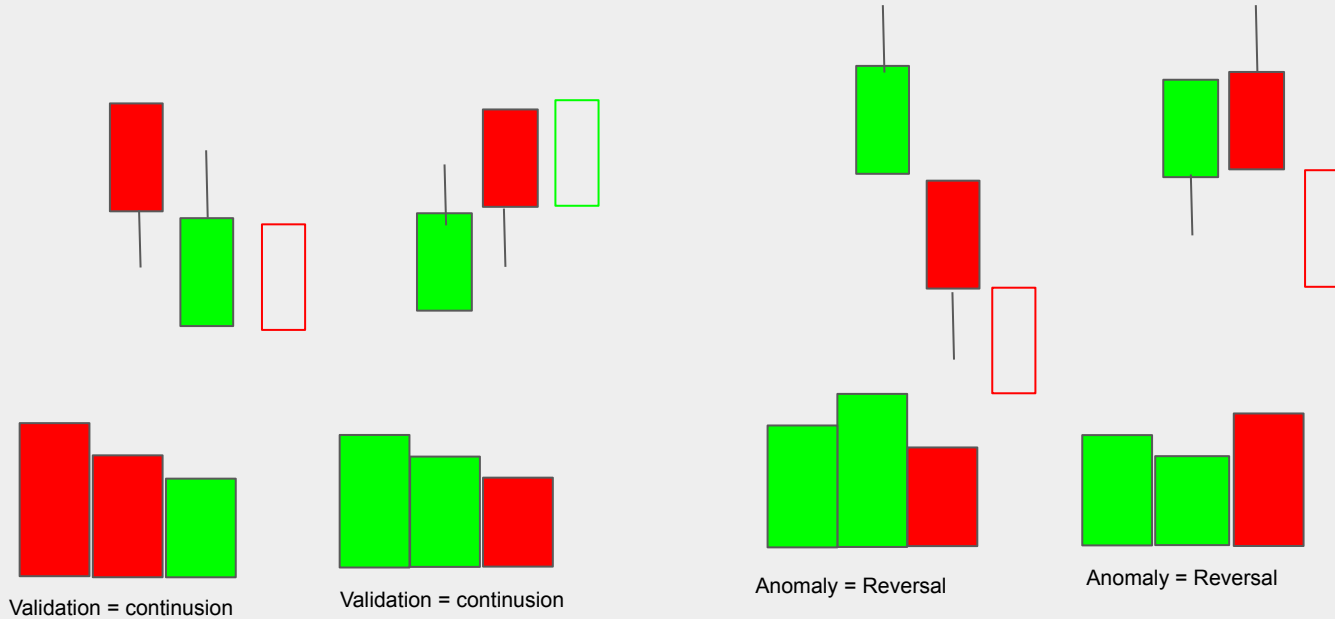

Anomaly = continusion

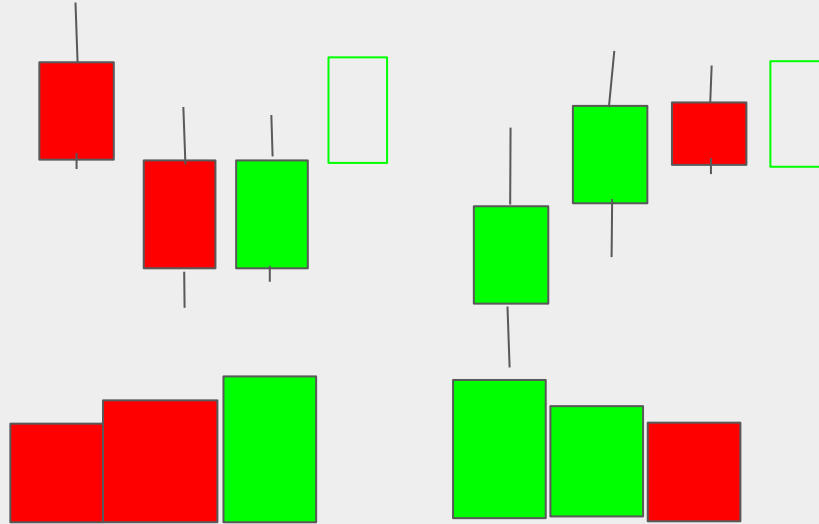

Anomaly = continusion

Rules-1 (Opposite wicks colour change)concept-4

In opposite wicks colour change if we see volume Validation then market will continue & if Volume show Anomaly then market will Reverse .

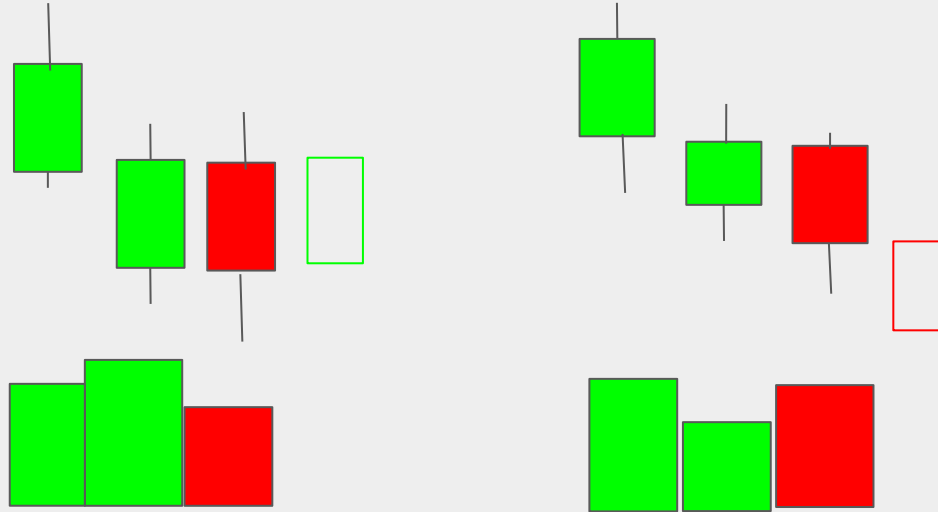

Rules-2 (Colour change)concept-1

In Rule-2 Colour change concept 1 we can see Validation on volume. But this is not important, at first we have to go previous 3rd candle and read from 3rd candle to last candle. Then in 2nd candle any party power less then in next candle (3rd candle) opposite party should be strong. If opposite party increase there volume then next 4th candle will be that party or other party will Come again.

(NOTE: in colour change no rules will consider only read candle previous 3rd candle to last candle.)

Rules-2 (Colour change)concept-2

In Rule-2 Colour change concept 2 we can see Anomaly on volume. But this is not important, at first we have to go previous 3rd candle and read from 3rd candle to last candle. Then in 2nd candle any party power less then in next candle (3rd candle) opposite party should be strong. If opposite party increase there volume then next 4th candle will be that party or other party will Come again.

(NOTE: in colour change no rules will consider only read candle previous 3rd candle to last candle.)

Rules-3 (length)concept-1

**When two same candles Then we have to use
Rule-3 (length analysis).**

Small wick Low volume - Continue

Small wick High volume - Reversal

Rules-3 (length)concept-2

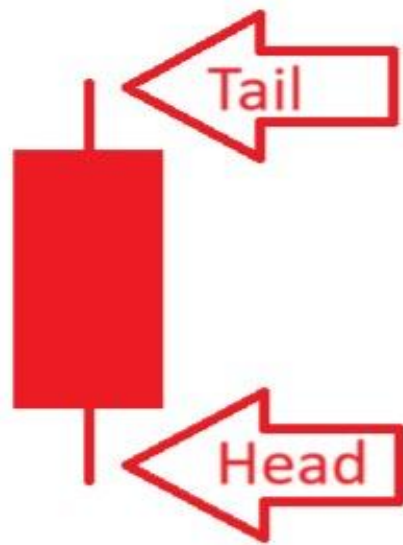

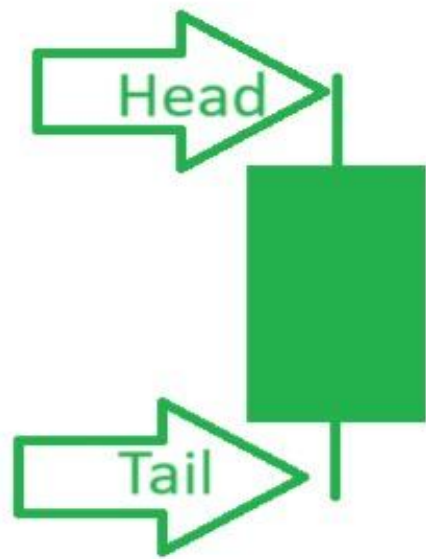

When two same candles Then we have to use Rule-3(length analysis).

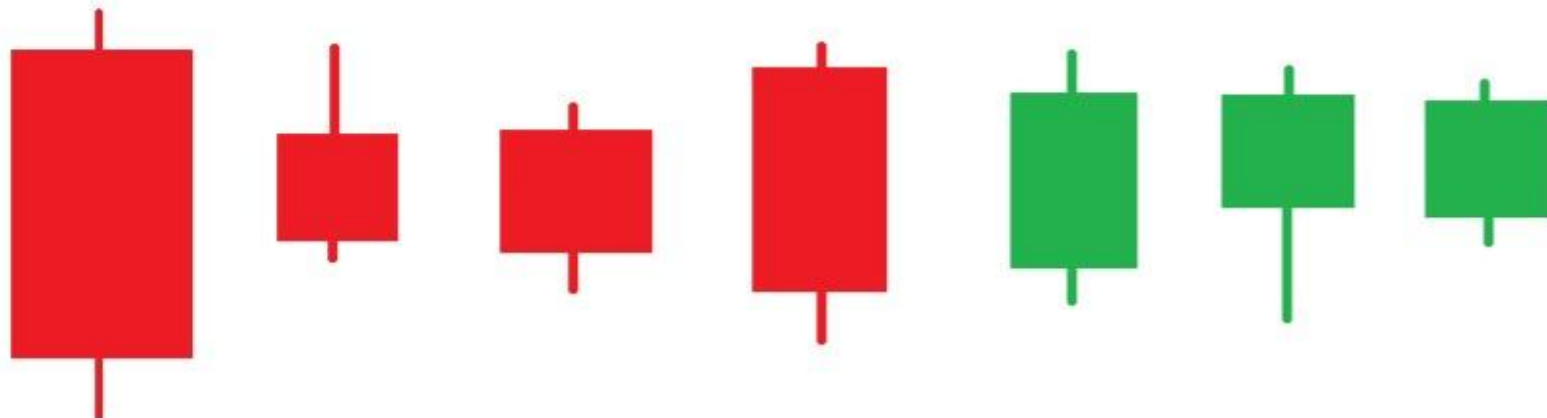

Long wick High volume - Continue

Long wick Low volume - Reversal

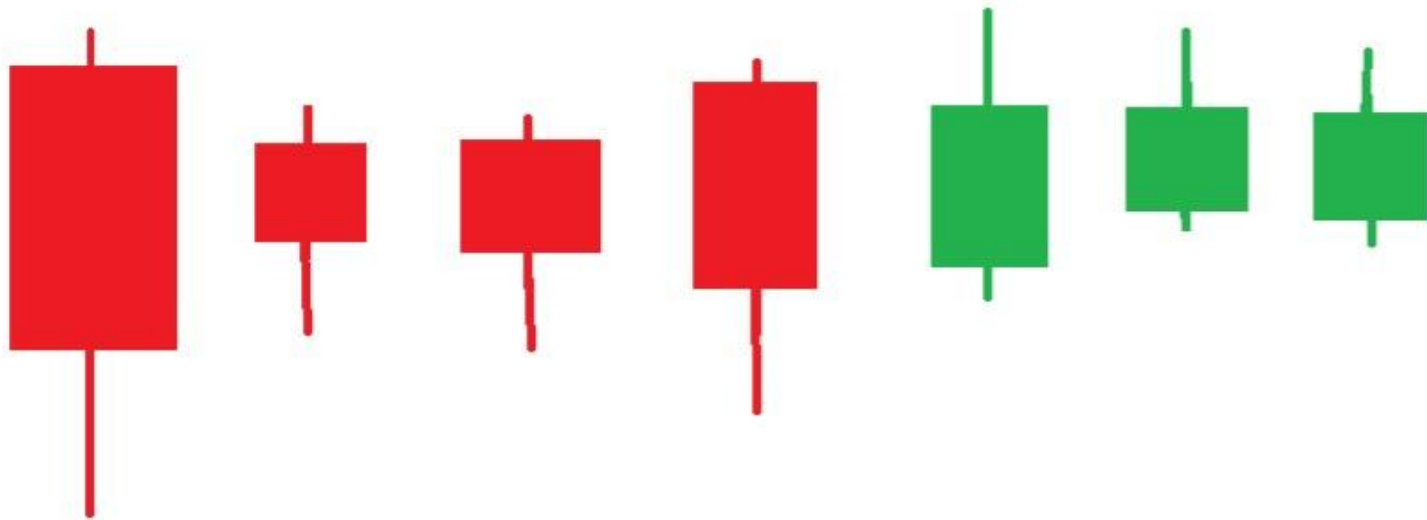

Rule - 03 How To Use

- 1) Trendy Market,
- 2) Use With Rule 01,
- 3) Avoid Trade if 1st candle is Marubozu !
- 4) Avoid DNA crossing Market or Ranging Market.
